**RESPONSE TO RESTRICTION/ELECTION REQUIREMENT**

Sir:

This paper is in response to the Office Action mailed February 6, 2006, concerning the above-caption application. The period for response to this Office Action extends until March 6, 2006.

In the Office Action, the Examiner required restriction under 35 U.S.C. 121 in the present application to one of the following inventions:

Group I – Claims 1-36 drawn to a fuel cell, in class 429/12; and

Group II – Claims 37-49 drawn to method of making a separator plate for a fuel cell, in class 429/34.

Applicants hereby elect with traverse Group I directed to a fuel cell. Applicants make this election without prejudice to filing one or more divisional applications directed to the non-elected group. Applicants will cancel the claims directed to the non-elected group when an indication of allowance of the elected group is received.

In the Office Action, the Examiner states the claims of Group I are directed to patentably distinct species of the claimed invention, namely:

I-1, Claims 1-9 drawn to a fuel cell comprising a first manifold, a plurality of spacers and a second manifold;

I-2, Claims 10-25 drawn to a fuel cell comprising a first separator sheet, a first set of spacers, a second separator sheet and a second set of spacers; and

I-3, Claims 26-36 drawn to a fuel cell comprising a membrane electrode assembly, a manifold and a planar flow field.

Applicants provisionally elect Species I-1 in response to this election requirement with traverse and acknowledge the Examiner's statement that Claims 1-9 are readable on Species I-1.

Notwithstanding the provisional election of Species I-1, Applicants submit that the three species identified by the Examiner are not directed to distinct inventions; rather they are different definitions of the same disclosed subject matter, varying in breadth and scope of definition. See, MPEP 806.03 and 808.01(a). It should be appreciated that the claims associated with each of the species by the Examiner read on the embodiments illustrated in FIGS 1-6B. As such, Applicants submit that Claims 1-36 are generic to the embodiments shown in FIGS 1-6B. Further, the disclosure of the present application clearly shows a relationship between the species as identified by the Examiner. Accordingly, Applicants request examination of Species I-1, Claims 1-9, and request reconsideration of the Examiner's election requirement as to Species I-2, Application No.: 10/758,816

Claims 10-25 and Species I-3, Claims 26-36. Upon allowance of a generic claim, Applicants note that they are entitled to consideration of claims directed to Species I-2 and Species I-3 which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. §1.141. Prompt and favorable examination of this application is requested.

Accordingly, it is believed that the outstanding Office Action has been fully complied with herein. If the Examiner has any questions or would like to personally discuss this application, she is invited to contact either of the undersigned attorneys at the telephone number listed below.

Respectfully submitted,

Dated: March 6, 2006
